

**Name:**

Mesut DENİZ

Country:

Turkey

Company:

Süper Film

Job Title:

Integrated Management Systems Executive

About you...

I have been working in different sectors as a mechanical engineer for eight years. I currently work as an Integrated Management Systems Executive at Süper Film.

Why did you join the BRCGS Professional Programme?

I wanted to be part of an international program relating to a standard that I have been involved with. I thought it would benefit both my career and my team.

What value do you personally feel the BRCGS Professional certification brings to you?

During the programme, I gained knowledge and experience to improve myself in many subjects. It has been beneficial for me to receive training from competent people and to exchange information with people from different sectors. Also, the international recognition makes me happy and proud.

How has the training helped improve operations at your site/company?

I gained different perspectives and information in the training throughout the programme and from sharing experiences with real people from different sectors. I reinforced my learning by putting what I gained into practice in my workplace.

What did you most enjoy about the training?

The interactive application and group work that we did throughout the training.

What are you most looking forward to within the Professional community?

Transfer of experience and knowledge through networking and meetings.

How do you plan to keep your skills up to date?

I will keep my learning up-to-date through the PPP system, and I will follow current developments with sectoral trainings and events.

What are your career ambitions/aims?

It has always made me happy to improve myself in my career and share my knowledge with those around me. Following this direction, I aim to transfer what I know to others, contribute to the formation of food safety awareness and lead a wider team.
