

**Name:**

Aycan ACET

**Country:**

Turkey

**About you...**

I worked in the food sector in the production, quality, technical directorship and training departments. I started in the industry as a consultant. I have served as the chief auditor in ISO 9001,2200,14001,45001,halal standards. I have successfully completed my BSC Chief Auditor training. As a trainer, I organized technical trainings in chief inspections and different fields. I am currently working as the System Certification Manager at INSPECCO Certification and Supervision company. I aim to provide the best quality service to our companies that want to work in the field of BRCGS, to serve as a happy customer with accurate and safe service. Also I love my job and I am constantly trying to improve it. In particular, implementing and improving quality systems is among my goals, and this positively affects my performance.

**Why did you join the BRCGS Professional Programme?**

I work as a chief auditor and instructor in various standards. within the scope of our company, we are carrying out studies related to BRCGS. My aim is to provide better quality and reliable service by increasing my competence in this field.

**What value do you personally feel the BRCGS Professional certification brings to you?**

This certificate strengthens my confidence and ability to support food safety, quality and legality. Through the program, I have received a lot of training provided by qualified instructors, including lead auditor training, which has helped me become a versatile BRCGS leader.

**How has the training helped improve operations at your site/company?**

By combining my experience with my profession and adopting this awareness, I aim to provide a professional service in the fields of supervision and education. In this direction, I want to improve the quality of the service we offer.

**What are your career ambitions/aims?**

My current career goals are to continue working with 100% commitment to leadership and management, to share the experience I have gained in this regard and at the same time to continue working in this field as one of the professionals, to continue my work on the globally approved standards in order to develop the sector by increasing BRICS and other GFSI applications.
