

**Company Name:**

Place UK Ltd

Can you please introduce your company?

We are a British food company providing solutions for retailers and manufacturers across IQF & Frozen Fruit, Pulses, Rice and Pasta. Specialists in adding value to your products, whether co-packing or providing bespoke innovation.

Why did you choose the BRCGS Standard?

We chose the BRCGS standard as it's a world leading GFSI scheme that is recognised worldwide.

The standard is easy to follow with lots of supporting guidance. In addition most of our customers standards are also based on the BRCGS layout

It's a minimum requirement for supplier approval to some of our customers and meets all the requirements of others.

What are the benefits being BRCGS certificated?

The benefits of being BRCGS certified it gives our customers the confidence that our ways of working are aligned to a GFSI internationally recognised standard.

With the audit being unannounced we don't have the opportunity to prepare for the audit, and the result is testament that the standards are embedded in our day to day work ethics.
